Work experience

Logary Analytics
Front-End Developer

Feb 2021 — June 2021

Worked on building the company web application, mostly UI related tasks, creating graphs for analytical purposes.
Focus on mobile first and re-usable components.
The work was mostly front-end focused but with some back-end sprinkled in, to get a feeling of how it all came together.

Back-End consisted of GraphQL with hasura, Docker, and PostgreSQL.
Front-End was written with TypeScript, Reactjs and Nextjs.

Mälarö Omsorg
Vårdbiträde

August 2017 — July 2019

Helped the elderly or less capable with their day-to-day things, tasks could range from going shopping to accompanying them to the hospital.
More importantly was learning how to cope with a tight schedule and planning your day accordingly.

STIL
Personlig Assistent

May 2015 — April 2017

Part of a team that took care of one set individual with all their basic needs and wants, ranging from personal care to drinking coffee and chatting for hours.

I learned quickly how to be both flexible and to also listen to the persons wishes.

Education

Webbutveckling
Changemaker Educations

August 2019 — June 2021

 - Programming
- HTML & CSS
- JavaScript
- Reactjs
- PHP
